### Notes

1. Values are for SPS 2012 in sterling (and do not include modulation deductions)
2. These data include the New Forest
3. These data may include some non-registered shared grazing
4. Unclaimed amounts within claimed commons were recycled within the relevant region at the start of the scheme
5. Common land areas are derived from the 'biological survey' data, may contain errors, and do not exclude ineligible features
6. These data do not include registered commons which were claimed only by an owner (as the owner) and were not treated as common land
